

Secure State Cyber (Canada)

Head of Regional Office and Director of Operations

Secure State Cyber (Canada) seeks an executive level professional with experience in providing high-value services to corporate clients in the private and / or public sectors. Expertise in the IT industry, although not essential, would be an advantage.

Team leadership qualities and the capacity for seamless cross-border collaboration are highly desirable.

The successful candidate will have the competence and capacity to oversee the development of new business opportunities and maintain a customer base in Atlantic Canada while managing the day-to-day regional operations of Secure State Cyber (Canada) from our new Canadian base in Halifax NS.

This is an opportunity to build an organization, based on a successful model developed by the Swedish parent company in the fast-growing information security space.

Secure State Cyber (Canada) offers a competitive salary and benefits, reflecting the challenge of creating a new business which will provide world-class cybersecurity services, developed and proven over more than fourteen years in commercial operations, to safeguard critical operations of clients in every sector.

Longer term, Secure State Cyber (Canada) foresees business expansion to the wider market of Eastern Canada where cybersecurity services are currently underdimensioned to meet rapidly growing demand.

About Secure State Cyber Group

Secure State Cyber Group is a Swedish company, based in the city of Norrköping, Sweden, with operations in the national capital, Stockholm. Secure State Cyber has served public and private sector clients in its home territory since 2005.

Secure State Cyber was created, and is owned and operated today, by cybersecurity professionals who understood the critical present and future needs of government, business and society for secure computer and communication operations.

Building on the closer commercial relations between Sweden and Canada made possible by the CETA Agreement of 2017, Secure State Cyber moved quickly established a wholly-owned Canadian subsidiary in Halifax NS the very next year.

Secure State Cyber (Canada) Inc. provides professional services and consulting in the cybersecurity field. From our Canadian office we support customers in both Europe and Canada with network monitoring services, risk assessments, cyber audits and privacy issues. Services are provided in close collaboration with our Swedish head office.

Secure State Cyber: Company Values

We value the confidence of our clients. We serve them with integrity and respect. We strive for total reliability and deliver all services with the highest quality and accuracy.

We maintain a service-focused and results-oriented operation in order to ensure maximum benefit for our customers and partners. We place those we serve at the heart of all operations. Our services are entirely team-based in order to ensure the highest possible quality and to avoid reliance on any one individual.

We see opportunities for potential and continuous improvement in all our work. Shared competence and experience are the core tools we apply in addressing the needs of our customers.

All of our work is based on high-calibre knowledge and experience. Applying proven structured methods and modern tools, we create sustainable results. The competence and analytical capability which our teams bring to each task ensures the highest possible quality in the service we provide to our customers.

Building on skills developed over many years, we ensure information security for corporations, public authorities and other organizations across society.

Secure State Cyber helps make the digital community a safer place.
